

LEO

JUL 23 - AUG 22

The secret is out... Everyone loves a Leo! Known for their fun-loving spirit, apparent confidence, generosity and leadership qualities, Leos seem to live life large. They imagine life to be an endless parade of fun, passion and creative self-expression with themselves on centre stage. For Leo, if it's not enjoyable, then why bother at all? They can be loyal and generous, and as such are at their best when surrounded by groups of admiring friends.

As they mature, they develop the self-confidence, initiative and problem-solving skills which make them natural leaders - ready to take command. Because Leo is associated with prestige and influence, they like flamboyant events, drama turns, and receiving accolades. They also often have fabulous hair and look good in almost anything.
