

SCORPIO

OCT 23 - NOV 21

Reportedly the best lovers of the Zodiac, Scorpios are a complex sign with many levels of expression. Smouldering and intense, they like one-on-one time with someone close. Typically interested in quality over quantity, Scorpios enjoy forming deep connections with others through which they can explore intimacy and emotional depth. Most often, Scorpios are strong, resilient, passionate and resolute. In work, they are dedicated and ambitious. In love, they are loyal and true. Although generally private or reserved on first impression, once their trust is gained they can be the most generous and forthcoming of friends. But be warned, never betray their deeply loving hearts. Cross a Scorpio and they will cut all ties, never looking back.
