

# CAPRICORN

DEC 22 - JAN 19

The official "can-do" folk of the Zodiac, Capricorns like to get things done. Practical and hard-working, they are results-oriented people who can be relied upon to finish a task. They like to learn things properly and often "doing it the hard way" is part of the Capricorn graft, but once they have mastered a challenge they never look back. Innately ambitious, Capricorns seek to live up to the best of their abilities. Despite their penchant for responsibility and managing outcomes, Capricorns are also pleasure-seekers par excellence. They love a good party and can be relied upon to keep the fun happening with their dry sense of humour and incredible stamina.
